Table of Contents

Foreword	vii
Preface	viii
Conference Organization	ix

Invited Papers

Indexability, Concentration, and VC Theory	3
<i>Vladimir Pestov</i>	
Where are you heading, metric access methods? A provocative survey	13
<i>Tomáš Skopal</i>	

Indexing

Dimension Reduction for Distance-Based Indexing	25
<i>Rui Mao, Willard Miranker, Daniel Miranker</i>	
On the Asymptotic Behavior of Nearest Neighbor Search Using Pivot-Based Indexes	33
<i>Benjamin Bustos, Nelson Morales</i>	
Enlarging Nodes to Improve Dynamic Spatial Approximation Trees	41
<i>Marcelo Barroso, Nora Reyes, Rodrigo Paredes</i>	

Approximate Search

Indexing Inexact Proximity Search with Distance Regression in Pivot Space	51
<i>Ole Edsberg, Magnus Lie Hetland</i>	
On Locality-sensitive Indexing in Generic Metric Spaces	59
<i>David Novak, Martin Kyselak, Pavel Zezula</i>	
On Locality Sensitive Hashing for Metric Spaces	67
<i>Eric Sadit Tellez, Edgar Chavez</i>	
CP-Index: Using Clustering and Pivots for Indexing Non-Metric Spaces	75
<i>Victor Sepulveda, Benjamin Bustos</i>	

Applications

Improving the Similarity Search of Tandem Mass Spectra using Metric Access Methods	85
<i>Jiří Novak, Tomáš Skopal, David Hoksza, Jakub Lokoč</i>	
Case Study: An Inverted Index for Mass Spectra Similarity Query and Comparison with a Metric-space Method	93
<i>Rui Mao, Smriti Ramakrishnan, Glen Nuckolls, Daniel Miranker</i>	
kNN Based Image Classification Relying on Local Feature Similarity	101
<i>Giuseppe Amato, Fabrizio Falchi</i>	
Similarity Matrix Compression for Efficient Signature Quadratic Form Distance Computation .	109
<i>Christian Beecks, Merih Seran Uysal, Thomas Seidl</i>	

Demonstrations

www.MMRetrieval.net: A Multimodal Search Engine	117
<i>Konstantinos Zagoris, Avi Arampatzis, Savvas Chatzichristofis</i>	
SHIATSU: Annotating Your Videos the Easy Way!	119
<i>Ilaria Bartolini, Corrado Romani</i>	
Audio Similarity Retrieval Engine	121
<i>Pavel Jurkas, Milan Štefina, David Novak, Michal Batko</i>	
Improving the Image Retrieval System by Ranking	123
<i>Petra Budikova, Michal Batko, Pavel Zezula</i>	
Visual Video Retrieval System Using MPEG-7 Descriptors	125
<i>Vojtěch Zavřel, Michal Batko, Pavel Zezula</i>	
Sub-image Searching Through Intersection of Local Descriptors	127
<i>Tomas Homola, Vlastislav Dohnal, Pavel Zezula</i>	

Posters

On Applications of Parameterized Hyperplane Partitioning	131
<i>Jakub Lokoč, Tomáš Skopal</i>	
Efficient and Effective Similarity-based Video Retrieval	133
<i>Ilaria Bartolini, Corrado Romani</i>	

Author Index	135
------------------------	-----

Foreword

The *International Conference on Similarity Search and Applications (SISAP)* is a conference devoted to similarity searching, with emphasis on metric space searching. It aims to fill in the gap left by the various scientific venues devoted to similarity searching in spaces with coordinates, by providing a common forum for theoreticians and practitioners around the problem of similarity searching in general spaces (metric and non-metric) or using distance-based (as opposed to coordinate-based) techniques in general.

SISAP aims to become an ideal forum to exchange real-world, challenging and exciting examples of applications, new indexing techniques, common testbeds and benchmarks, source code, and up-to-date literature through a web page serving the similarity searching community. Authors are expected to use the testbeds and code from the SISAP web site (www.sisap.org) for comparing new applications, databases, indexes and algorithms.

After the very successful first events in Cancun, Mexico (2008) and Prague, Czech Republic (2009), this year SISAP conference has been held in Istanbul, Turkey, on September 18-19, 2010.

Preface

This volume contains 2 invited papers, 11 regular papers, 2 posters and 6 demos, presented at SISAP 2010 conference, held in Istanbul, Turkey, on September 18-19, 2010. The papers were selected from 29 submissions, by a renowned program committee. We received submissions from all over the world (Argentina, Chile, China, Cuba, Czech Republic, Germany, Greece, Italy, Japan, Mexico, Norway, Spain, and USA). In this third volume of the SISAP series, the acceptance ratio of 66% was achieved as a result of the increasing quality of submissions established last year. The papers were selected based on their originality, relevance, and technical strength.

The submissions cover the spectrum of similarity searching topics from novel indexing techniques, to approximate methods for speeding up similarity search in metric/non-metric spaces, to applications in computerized biology, image classifications, and content-based image retrieval. In the demonstrations section a large number of interesting prototypes of similarity search engines, related to content- and semantics-based retrieval of multimedia data (audio, images, and video), was presented. Finally, the posters present an approach for balancing splits in indexing techniques based on generalized hyperplane partitioning and a system for automatic video annotation based on similarity among detected shots.

Two invited speakers gave excellent and thought-provoking talks. Prof. Vladimir Pestov provided interesting connections between similarity searching in metric spaces, the phenomenon of concentration of measure on high-dimensional structures, and the Vapnik-Chervonenkis theory of statistical learning, deriving bounds on performance of well-know indexing structures and showing how statistical learning methods can be used to build indexing schemes in datasets drawn from distributions of lower intrinsic dimension. Prof. Tomáš Skopal discussed the impact of the metric indexing paradigm on real-world applications, analyzing the world of similarity searching in metric spaces from the point of view of practitioners, transforming his conclusions into research challenges and perspectives of the similarity search methods. These contributions given by leading researchers definitely contributed to an in-depth and up-to-date understanding of fascinating fields and will surely stimulate further research.

Extended versions of the best SISAP 2010 papers were collected and will be published in a special issue of *Journal of Discrete Algorithms* (Elsevier).

We are grateful to the program committee members, the local organizers, and the external reviewers for their committed and high-quality work. We highly appreciate the work done by Karina Figueroa for maintaining the Metric Library, and those who contributed to it. Reviewing of papers and preparation of the proceedings were done using the EasyChair conference system (www.easychair.org), for which we specially thank Andrei Voronkov. Last but not least, we thank Adrienne Griscti (ACM program manager for SIG publications) for her hard work in helping us publishing these proceedings.

Conference Organization

Program Chairs

Paolo Ciaccia, *Università di Bologna*
Marco Patella, *Università di Bologna*

Program Committee

Edgar Chávez, *Universidad Michoacana - CICESE*
Alfredo Ferro, *Università degli Studi di Catania*
Daniel Keim, *Universität Konstanz*
Daniel Miranker, *University of Texas at Austin*
Gonzalo Navarro, *Universidad de Chile*
Hanan Samet, *University of Maryland*
Tomáš Skopal, *Univerzita Karlova v Praze*
Agma Juci Machado Traina, *Universidade de São Paulo*
Pavel Zezula, *Masarykova Univerzita*

Local Organization

Cengiz Celik, *Bilkent University*

Referees

Maria Camila Nardini Barioni	Vladimir Pestov
Benjamin Bustos	Giuseppe Pigola
Geoff Ellis	Ives Pola
Karina Figueroa	Alfredo Pulvirenti
David Hoksza	Smriti Ramakrishnan
Curran Kelleher	Humberto Razente
Milos Krstajic	Nora Reyes
Jakub Lokoc	Matthias Schaefer
Mauricio Marin	Andreas Stoffel
Jiri Novak	Andrada Tatu
Daniela Oelke	Marcos Vieira
Oscar Pedreira	Leishi Zhang
